## About Us

Hypertec DCS is a data center services provider that offers a wide range of colocation services, connectivity services, deployment services, hardware support and disaster recovery, through its state-of-the-art carrier neutral data centers. It designs its facilities to surpass the infrastructure and budgetary requirements of the most demanding data center customers with its security, fault-tolerant power, cooling and network systems, high capacity, scalability and high density. With its proprietary ultra-efficient eco-friendly design, Hypertec data centers are considered among the most energy efficient in the world. The company's services are employed by service providers, cloud providers, hyperscale customers, large enterprises as well as by governments, small and medium businesses.
